About the No Dirty Gold Campaign

Earthworks and Oxfam America are working with local organizations and communities around the world to end destructive mining practices. The No Dirty Gold campaign calls upon the mining industry to commit verifiably to full respect for all basic human rights and to full protection of the environment. And it urges manufacturers and retailers to ensure that the gold in their jewelry, electronic goods, and other products was not produced at the expense of communities, workers, and the environment. For more information about the campaign, visit www.nodirtygold.org.

This report was written using publicly available data and interviews. The information contained herein is believed to be accurate but does not purport to be complete.
